## NEWS

*FOR IMMEDIATE RELEASE*

**Client: Hungerford & Terry, Inc.**

**Silver Springs, Nevada Receives 2010 Drinking Water Award  
from Nevada Environmental Protection Administration  
Hungerford & Terry Supplies Filtration Systems**

Clayton, NJ – The 2010 Nevada State Drinking Water Revolving Fund Award for Sustainable Health Protection has been awarded to the Silver Springs Mutual Water Company, located in Silver Springs, NV. Six (6) 11 ft. diameter filters that remove arsenic from the well water supply were supplied by Hungerford & Terry, based in Clayton, NJ.

The Silver Springs Mutual Water Company was nominated for the prestigious award by the Nevada Department of Environmental Protection and emerged as the winner. The arsenic removal filters, which were built by Hungerford & Terry for the Silver Springs drinking water supply, can handle 1800 gpm (expandable to 2400 gpm). The filters reduce the arsenic from 26 ppb to less than 4 ppb.

According to Ken Sayell, Vice President of Hungerford & Terry, “Hungerford & Terry engineers have done an outstanding job with this installation for arsenic removal. The award from the EPA is well deserved by the community and all who were helpful to Silver Springs in achieving quality drinking water. Everyone involved in the project worked extremely hard to consolidate the local water systems so that the entire area and surrounding community receive all the advantages of meeting, or exceeding, the state’s high standards for clean drinking water.”

In 2009, Hungerford & Terry, Inc. celebrated 100 years of designing and building water conditioning systems for a wide range of industrial, commercial and municipal operations throughout the world. Since its inception in 1909, Hungerford & Terry has designed and manufactured thousands of systems that incorporate both conventional and unique water treatment technologies that include filtration and ion exchange technologies.
