Client: Hungerford & Terry, Inc.

**Hungerford & Terry Receives \$2.3 Million Filtration Contract  
To Help Expand Water Requirements for the  
Buchman Direct Diversion Project for Santa Fe, New Mexico**

Hungerford & Terry has been selected to design and build five 12-foot diameter by 40-foot long horizontal, multi-cell GAC (granulated activated carbon) filters with a 3,000 cubic foot bed of GAC per filter. This contract is reported to be \$2.3 million dollars. The filters will be utilized for pretreatment to a membrane system that will treat 15 million gallons of water per day for the residents and businesses in the Santa Fe, New Mexico city and county.

For this project, the City of Santa Fe, New Mexico and its surrounding areas are adding approximately 8,730 acre feet of water per year in order to reduce their dependence on groundwater wells. The purpose of this project is to divert water from the Rio Grande River and deliver it underground to the water treatment plant. The project is expected to be completed in 2011.

According to Alan Davis, President of Hungerford & Terry, “This is an important project to ensure long-term, reliable high-quality water that is free from contaminants to serve the rapidly growing Santa Fe, New Mexico area.”

In 2009, Hungerford & Terry, Inc. celebrates 100 years of water conditioning for a wide range of industrial, commercial and municipal operations throughout the world.

Since its inception in 1909, Hungerford & Terry has designed and manufactured thousands of systems that incorporate both conventional and unique water treatment technologies that include removal of iron, manganese, nitrate, arsenic, radium and hydrogen sulfides.

Today, Hungerford & Terry is a leading distributor of high-performance water filtration media, including GreensandPlus. Based in Clayton, NJ, USA, Hungerford & Terry has over 30 sales representative organizations throughout the United States, as well as representatives in Canada, Central America, Argentina, Chile, Ecuador, Mexico, Peru, Uruguay and Asia.
